

Preparatory Classes for the Incoming Batch 2020-22

Since 2018, Calcutta Business School has launched a concept called Preparatory Classes before formal Orientation in July for about two weeks in June, to give its PGDM Program students a heads up on the main program. These classes were started with the objective of acclimatizing students with basics of logical sense, mathematical abilities, various facets of management education and communication skills. 'Preparatory Program' would help students in getting a preview of the pedagogy at CBS which emphasizes on case study method, group work, project activity and experiential learning.

This year due to Covid 19 and the extra ordinary situation that it has created all around, Preparatory Classes for the PGDM Batch 2020-22 are being done on line with no compromise on quality and content. We are hoping to start physical on Campus classes as soon as we tide over the crisis period and subject to green signal given by AICTE to resume normal classes.
